Objective

Computer Science graduate with hands-on experience building AI-powered SaaS products and a genuine passion for the AI-commerce ecosystem. Eager to join a founding GTM team, drive outbound pipeline, and help global brands win visibility in AI-first discovery platforms like ChatGPT and Perplexity. Good communicator with strong problem-solving abilities and experience collaborating in team-oriented environments.

Technical & AI Product Experience

Networking Engineer Associate Intern — Akamai Technologies, Bangalore

- Supported deployment and onboarding activities for web and media CDN solutions in enterprise environments.
- Collaborated with cross-functional teams to troubleshoot implementation issues and improve operational workflows.
- Gained exposure to client-facing coordination, technical problem-solving, and large-scale networking infrastructure.
- Assisted in improving internal deployment processes and validated network performance using TCP/IP, DNS concepts

Sales & GTM Experience

Entrepreneurial Sales — Business Bazaar Perfume Stall

- Prospected and converted walk-in customers through personalized discovery conversations, closing sales with a consultative approach that matched products to stated preferences.
- Designed and executed a multi-touchpoint engagement strategy (sampling, storytelling, upselling) that drove strong revenue in a competitive stall environment.
- Gained first-hand resilience in high-rejection environments: high foot traffic meant fast pivots, reading body language, and adapting messaging on the fly.

Head — DevOps Club

- Built and led outreach campaigns to grow club membership, increasing participation in technical events through targeted communication and value-led messaging.
- Delivered presentations and workshops to 50+ students — developed strong verbal communication, persuasion, and audience engagement skills.
- Coordinated cross-functional efforts between club members and faculty stakeholders, managing timelines and follow-ups.

Projects

AI SaaS Platform — PERN Stack

2025

- Built a production-ready SaaS platform on the PERN stack, handling 100+ concurrent API requests with structured data flow via PostgreSQL (Neon) and RESTful endpoints.
- Integrated OpenAI APIs to power AI-driven features, reducing manual user effort by automating key workflows.
- Owned product-oriented feature design, API integrations, and auth flows end-to-end — understands the product deeply enough to demo it credibly to technical and non-technical buyers.

WhatsApp AI Clinic Appointment Assistant — APIs, n8n

2026

- Automated end-to-end clinic appointment booking through WhatsApp using n8n workflows, reducing manual scheduling effort by approximately 80%.
- Designed backend logic to handle concurrent booking requests and resolve scheduling conflicts in real time..

Technical Skills

- **Languages & Web:** JavaScript, C++, SQL, React.js, Node.js, REST APIs
- **Databases & Tools:** PostgreSQL, MongoDB, MySQL, Git/GitHub, Postman, Vercel, n8n
- **AI Ecosystem:** OpenAI APIs, agentic workflows, LLM-powered product development, AI-commerce trends
